## R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <a href="http://rmarkdown.rstudio.com">http://rmarkdown.rstudio.com</a>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
                       dist

## **Including Plots**

You can also embed plots, for example:

Note that the echo  $\,=\,$  FALSE parameter was added to the code chunk to prevent printing of the R code that generated the plot.
